How to insert your SWF flash animation presentations into Microsoft Excel worksheet (2003, 2007, 2008, 2010)?

To import your Flash movie into Excel, you also need to add "Shockwave Flash Object" control and insert SWF files inside. The following steps will guide you how to add "Shockwave Flash Object" control and import SWF file into Microsoft Excel worksheet.

1. Add "Developer" tab into Excel 2007, 2010, 2008 menu bar. Click Microsoft Office Button on the top left and click "Excel Options", then choose "Show Developer tab in the Ribbon" and click "OK".
2. Import "Shockwave Flash Object" to Excel (2007, 2008, 2010). Go to "Developer" > "Insert" > "Form Controls">"More Controls" window and select "Shockwave Flash Object" to add a control square inside to worksheet. Then you can use your mouse to drag and resize the control(View the sample below)

3. Right click the square and choose "Properties" to the Properties dialog box. Then you need to do some settings for your animation movie like this:

Autoload = True

EmbedMovie = True

Enabled = True

Loop = True

Playing = True (if you want your picture gallery slides play automatically when open Excel Worksheet)

Movie = C:\presentation.swf (If you want to add and insert a .swf file from your website, you can use the link like this: <http://www.yourwebsite.com/presentation.swf>)

AlignMode	0
AllowFullScreen	false
AllowNetworking	all
AllowScriptAccess	
AutoLoad	True
BackgroundColor	-1
Base	
BGColor	
DeviceFont	False
EmbedMovie	True
Enabled	True
FlashVars	
FrameNum	3
Height	144
left	53.25
Locked	True
Loop	True
Menu	True
Movie	D:\presentation.swf
MovieData	
Placement	2
Playing	True
PrintObject	True
Profile	False
ProfileAddress	
ProfilePort	0
Quality	1
Quality2	High
SAlign	
Scale	ShowAll
ScaleMode	0
SeamlessTabbing	True
Shadow	False
SWRemote	
top	33
Visible	True
Width	144
WMode	Window

After finish setting, please save and close the "Properties" window. Then you go to the "Developer" tab and click "Design Module" to preview your animation slide show presentation.

4. Close your Excel 2007, 2008, 2010 worksheet file. When you open it again, you will view your dynamic image album slides playing automatically.(view sample image below)
